# specifying your design

---

# begin with your worktop

## Design

The Axiom® Collection features 50 stunning worktops from rustic woods to contemporary stones, each palette features a range of designs to suit any kitchen.

## Thickness and edges

We have chosen the best edge and thickness to suit the design, giving the most appropriate and realistic aesthetic to each worktop.

## Texture

From the matte finish to the real-touch feel of our stunning woodgrains, our design experts' understanding of texture - and its interplay with light - have ensured designs and textures work together to deliver stunning beauty across the full Axiom Collection.

**British Block** Essence (38 mm square edge worktop and breakfast bar with matching upstand)

# woods

---

blocked & planked  
rustic features  
simple grains

Whether you're creating a light, bright kitchen or an atmospheric sanctuary based on a darker palette, the natural beauty of our stunning woods range will complement your space perfectly.

Our classic blocked and planked woods offer subtle, calming effects, with a matching thickness to complete the look.

An expertly curated selection of rustic woods provides supreme flexibility for those looking for the ultimate in authenticity. Or enjoy the eye-catching appeal of our simple grains, where oaks and other traditional woods are available in a range of tones.

**British Black** Essence (38 mm square edge worktop with matching upstand)

# stones

---

## contemporary classic

Feel the cool drama of the Axiom® contemporary stones. Marbles and slates deliver a modern show-stopping moment for kitchens of any size, available in a square edge and 22 mm or 38 mm thickness, depending on the design.

If a traditional design is more your style, six classic stones offer spectacular detail with 38 mm thickness and curved edges.

platinum series  
engineered  
patterns  
concrete

With inspiration from nature, the platinum series and patterned designs create a look that is unique, delivering the 'wow' factor for your kitchen.

Alternatively, consider our engineered or concrete designs. There's inspiration for everyone. It's the simple way to create a statement piece that leaves you delighted every time you enter your kitchen.

enhance  
with your  
splashback

---

### Matching splashbacks

Every Axiom® worktop is available with a matching splashback and upstand, ensuring you can create a continuous feeling throughout your kitchen.

### Feature splashbacks

To create a true statement, style your kitchen with a feature splashback to add either a classic colour from our heritage inspired palette, or a contemporary eye-catching pattern.

### Heights

Why not mix and match to create a stunning personalised design.

Pick between a 100 mm high upstand, and 600 mm or 1210 mm splashback to customise your kitchen design.

# feature splashbacks

---

solid colours  
metal  
frosted  
patterns

Install a true talking point with a striking Axiom® feature splashback. Choose from our trend led colours or shimmer in spectacular fashion with frosted and metal designs. For an enduring appeal consider a herringbone or terrazzo inspired pattern that will take centre stage.

Nina Bailey

Formica Group - UK Design Manager

When it comes to designing your kitchen, you'll usually know what type of style you want – whether that be modern and contemporary or classic and elegant.

The units are the main covering in any kitchen, so start the design process by deciding what look you want for the fronts of your cupboards and drawers. Typically, most opt for a solid colour or wood effect. For longevity, a neutral product can be used such as a grey, white or beige colour. Even subtle greyed-off hues of blue and green work well. These will then combine and complement the other elements of the kitchen.

Choosing a worktop comes next, and you'll want something that works perfectly with the units. Our Axiom® Collection offers a variety of material looks and finishes, so you're bound to find what you're looking for.

Colour and patterns are quick, accessible ways to put personality in to your kitchen. There's no better way to do this than with a splashback. It covers a large part of the wall surface, so can have a dramatic impact on the kitchen's overall look. A solid colour can have a similar aesthetic to a painted wall, but with easy-to-clean properties. The splashback colour palette means you can use the sophisticated and elegant hues of dusky pinks, blues and greens. If you want to add pattern and personality, consider terrazzo effects and geometric herringbone finishes.

The abstract worktop palette in Axiom allows you to use products with a natural aesthetic that are actually art-worked designs, such as Layered Sand and Painted Marbles.

The kitchen is now the hub of the home and a multifunctional space for working, playing, dining and relaxing. Consider these elements when designing the space and decide which colour and material looks will work best.

It's also important to think practically about your choices of material, while still creating a room you love being in.

Add design features such as open shelves to show off your crockery and some of your most loved greenery, and make sure there is ample storage space to hide food, pots and pans.

Simple touches of colour from your kitchen accessories, such as your kettle and toaster, can provide bold statements and stunning finishing touches.

## colours

Make the most of your space with complementary colours across worktops, units and walls. Consider adding a personal touch with splashes of bold colours in accessories and furniture to really create the atmosphere you want.

## lighting

Flood your kitchen with natural light, then harness ceiling and under-cupboard lighting for the finishing touches. With careful planning, you'll enjoy both a practical environment for cooking and a moody, atmospheric retreat for wine and chatter.

## *accessories*

How will you dress your windows?  
What materials will you use for shelves?  
Accessories are often overlooked,  
but they're key to bringing your kitchen alive,  
ensuring it matches your taste and maximising its functionality.

## *styling*

Consider your kitchen's theme from the  
start. Embrace a clear vision and work  
around it, gathering appropriate textures  
and colours to fulfil your concept.

## *textures*

Bring warmth and depth to your kitchen with clever  
texture combinations. Pay attention to blinds, chairs,  
stools and curtains. Make deliberate decisions on  
your taps, toasters and kettles. Use glass, pottery,  
porcelain and china to stunning effect.

## sizes & edge profiles

We have matched the thickness, square and curved edge profiles, and texture to each design to create the optimum worktop collection.

### **Square edge (1 & 2)**

This design gives a slick and contemporary look to wood and abstract worktops.

### **Curved edge (3 & 4)**

#### **Axis (3)**

This tight 3 mm curved edge provides a modern slab look for wood, stone and engineered worktops.

#### **Linea (4)**

This classic 6 mm curved edge enhances stone, wood and platinum series worktops.

### **Thicknesses**

Like the worktop edges, each design has been matched with the ideal thickness to help create a chunky wood design or delicate marble slab.

Worktops are available in 22 mm (1) or 38 mm (2,3 & 4), depending on the design.

### **Sizes**

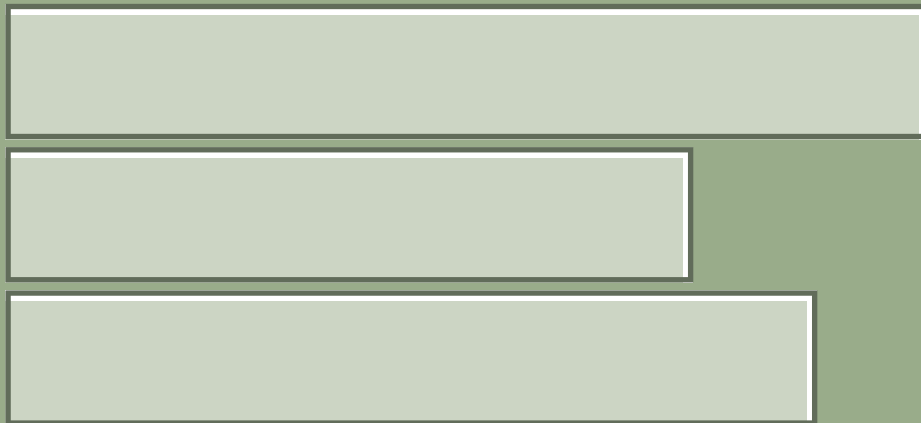

Offering ultimate flexibility, the Axiom® Collection is available as worktops and breakfast bars with matching splashbacks and upstands.

## Worktops

3000 x 600 mm  
3500 x 600 mm  
4000 x 600 mm

Actual product lengths vary slightly from those shown in the table. In order to simplify the availability table for ease of customer use, the above length measurements have been rounded down. This is in order to align lengths between Axis, Linea and square edge products, as the later has factory finished edging applied which reduces the product length slightly.

The accurate measurements are as follows:  
Axis and Linea products, upstands and splasbacks: 4000 mm is actually 4100 mm, 3500 mm is 3600 mm, and 3000 mm is 3050 mm (splashbacks 3030 mm).  
Square edged products: 4000 mm is 4070 mm, 3500 mm is 3570 mm and 3000 mm is 3020 mm.

## 10 year guarantee of quality

Formica Group warrants to the buyer of a Formica worktop, splashback or upstand that for a period of ten (10) years after installation, it will be reasonably free of defects in materials and workmanship and conform to published data sheets and specifications.

In the event that a product fails to conform to this limited warranty, Formica shall, at its sole option and discretion, either repair or replace such product.

Exclusions. This limited warranty does not cover any damages attributed to causes unrelated to Formica's manufacturing process, including but not limited to incorrect, faulty or improper handling and/or installation, damages caused by unreasonable use, misuse, physical abuse, accidental damage, normal wear and tear, exposure to corrosive elements in the atmosphere, mildew, or the use of harmful cleaning compounds.

Please refer to our Axiom® installation and maintenance guides on [formica.com](http://formica.com) for a full list of guidelines, warranties and exclusions.

Please Note:

- The guarantee becomes void once the curved post-formed edge has been cut off
- Due to the inherent properties of gloss, platinum etchings, metallic splashbacks and gloss splashbacks and upstands extreme care should be taken on installation to avoid scratching. Formica Group cannot accept any responsibility for the surface performance of these products if the owner/user fails to follow the installation and care guidelines
- Please consult the installation guide prior to installation

The installation and maintenance guide has been developed for guidance only. Formica Group cannot accept responsibility for the final fitting of your worktop. Colour and surface finish should be checked before installation. Formica Group will not accept any claims for re-fitting costs resulting from mis-matched surface colour or finish. To ensure that your laminate worktop remains in excellent condition, it is essential that all exposed edges of the chipboard are sealed with a silicone sealant or contact adhesive. For a sink cut-out, the exposed raw chipboard should be treated with a water seal or varnish. In addition to this, we would also recommend the use of a purpose made gasket, often supplied with the sink or silicone sealant applied to the perimeter of the sink prior to installation. The hob cut-outs can be protected in the same way but it is also advisable to cover the exposed edges and the edge of the laminate with aluminium foil, to prevent the heat affecting the cut-out.
